DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-39 have been considered but are most in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- Claims 1, 6-18, 22-27, 29-43, 46-48, and 51-59 are rejected under 35
 U.S.C. 102(b) as being anticipated by Haub et al (US patent 4378855), of record.

Claims 1, 6, 22-24, 29, 33-40, 51, 46, 47, Haub et al teach a multi-speed battery operated vehicle having a seat adapted to receive a person comprising a plurality of driving wheels 114; a steering assembly having a steering mechanism 11 positioned for actuation by an operator; a foot operating device controlled by the operator sitting on the seat; and a speed controlling including switches Msi, Ms2, Ms3, and MS4 for controlling the rate at which the speed is transmitted to the wheels

Claims 7-9, 14-18, 30-32, 48, 57-59, Haub et al describes that the speed would be increase depending upon the signals enter by the operator.

Claims 10-12, 52-56, the transmission of the speed of the motor would be selected by the position of switches MS1, MS2, MS3, MS4, the percentage of the

Application/Control Number: 10/081,934

Art Unit: 2837

transmitted speed would be determined by the selected switch that is chosen at the time of the design of the speed controller.

Claims 13, 25-27, 41-42, Haub et al describe in column 3 that time delay which can have any predetermined period of time is used in the operation of the speed controller.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 19-21, 43-45, 49, 50, are 60-62 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haub et al (US patent 4378855), of record.

Haub et al disclose the claimed invention except for the use of a microprocessor for controller the speed of the vehicle. It would have been obvious to one of ordinary skill in the art at the time of the invention was made to have a microprocessor in the speed controller, since it has been held that broadly providing an automatic means to replace a mechanical or manual device which has accomplished the same result involves only routine skill in the art. *In re Venner*, 120 USPQ 192.

Claim Objections

6. Claim 47 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper

Art Unit: 2837

dependent form, or rewrite the claim(s) in independent form. Independent claim 40 recites that the speed controller regulates the rate of the speed and claim 47 only repeats the same limitation.
